LOACO (grouped_random): 1-h groups shuffled 60/20/20; held-out class removed from train/val (20 folds on D1 families, D2, D3)
Natural novelty (temporal_gap, train-tail validation): classes first seen in the test period (classes: D1 2, D3 5, D5 2)
train head (80%)
train tail = val
gap
(unused val)
test: novel classes
D5 purged_block: 10-min blocks per capture day, 60/20/20, neighbours purged (D5: 219 blocks, 94 purged; 1 feasible fold)
Schematic (block layouts illustrative); counts from results JSON.
